SUMMARY

I am an analytical, creative, and detail-oriented professional seeking a position as a front-end developer. I have extensive experience in customer service, the importance of small details, accuracy, and quality control. Qualities that are indispensable in the tech industry. I'm looking to work for a company that values innovations for a better future for all.

SKILLS

LANGUAGES:	Javascript, CSS, HTML
FRAMEWORKS AND LIBRARIES:	React, Bootstrap, Redux, Node, Express
TOOLS:	Git, Axios, VSCode, Heroku, MongoDB, ESlint
TESTS:	Jest

PROJECTS

DEV Launchers

Project for a non-profit organization of a social media website to share new ideas.
- Constructed user-friendly front-end with React, Router, Axios and Styled-components
- Participated in weekly meetings to share progress and share ideas to improve the platform
- Collaborated with a team of developers, UX designers, and team leader to ship new features

Recipefy

Front-end application of a recipe website for food lovers.
- Designed front-end functionality with React, Router, and MUI
- Pulled data from the Edamam public API with Axios
- Utilized GitHub pages for deployment: https://joelcmk.github.io/Recipefy

MyFlix

Full-stack application of a film database for people that like movies.
- Created backend and RESTful API with Node.js and Express
- Designed front-end with React, Redux, and Bootstrap
- Built database to store movies and user's information with MongoDB
- Utilized Heroku for deployment: https://my-flix-app0.herokuapp.com/client/

EDUCATION

2020	**Career Foundry Software Engineering Career Track** - 7-month intensive course in Software Engineering methodologies and technologies
